### **DETAILED ACTION**

Terminal disclaimer filed on 12/01/03 is approved.

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

A. Species I, a wheel support bearing assembly including a ring member having a sectional shape and including a casing portion accommodating a coil and a plurality of prongs extending outwardly from the edges of the casing portion, claims 8 – 10.

B. Species II, a wheel support bearing assembly including a ring member including an annular magnetic pole portion in which magnetic poles of different polarities alternate one another and further including a second multi-pole magnets, the first and second mentioned multi-pole magnet being disposed on respective sides of the magnetic pole portion of the ring member, claims 11 – 16, 2, 3 and 5 – 7.

C. Species III, an anti-skid braking device including a wireless transmitter transmitting a signal from the sensor by way of a feeble radio wave and a controller determining a control of a braking force in dependence on the sensor output signal and the radio field strength signal, Claims 17 – 23.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Mr. Pitcher on 01/21/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
